

### Internship Policy

Internship is very crucial in a student's life as it provide students with hands-on experience in their respective engineering fields. It also allows students to apply theoretical knowledge to solve real-world problems. Students must be encouraged to take internships during their semester break. The process to be followed for internship is as follows-

- ❖ The faculty members will guide and suggest students to undergo internships. The Training and Placement Cell will also help students by interacting with the industry experts and assist students in applying for various internships.
- ❖ The students will then request the Training and Placement Cell to issue the Internship letter stating the name and address of the company along with nature of work and department.
- ❖ The Training and Placement cell will issue the internship letters to the students after through verification of the company by the Training and Placement cell.
- ❖ After completion of training, all the students will report to the respective departments along with certificate & complete outcomes of training.
- ❖ The assigned faculty will collect the internship report made by each student and will also conduct presentation to be presented by each student.
- ❖ The assigned faculty will give marks to individual student based on their internship report and presentation. The grades and marks are then shared to the affiliating university based on their requirement by the department.
- ❖ The department will take feedback from the students based on the internship and will perform an impact analysis from the feedback.
