

**Policy to encourage use of various Instructional Methods and Pedagogical initiatives**

- It is required that at least 10 to 20% of syllabus must be taught using various instructional methods and pedagogical initiatives with incorporation of various ICT tools as per the requirement of the syllabus. This will help to increase student's engagement and thus will result in making learning more effective and engaging.
- Faculty members to be encouraged to undergo various Faculty Development Programs either organized by the Institute/department or at other academic institutions as required.
- Each faculty member will be responsible to encourage collaborative learning among the students by taking some real-life examples.
- Each head of the department will explain various instructional methods and pedagogical initiatives to all the newly joined faculties and motivate them to use these instructional methods during their classes.
- Respective Head of Department will be responsible to implement said parameters in department and Dean (Academics) along with Director will keep vigilance on the activities.
